This is a regularly scheduled 5 year inspection that will require 3 year inspections if town water is withdrawn from this well as well as additional site test requirements.

If the town uses water from this well, a larger storage tank may be required and pressure boosting pumps will be required.

There is presently has a 250' buffer zone around the well. The water quality is good, (Andrea) but additional draw may pull contaminates into the well due to a larger draw circle from around the well center. The school usage currently averages 1800 GPD with a max of 3000 GPD. Well is permitted for 10,000 GPD.

3) Motion to adjourn at 10:30 a.m.

Motion: Steven Ingerson

Seconded: Mike McCallum

Vote: Unan
